

What's GMB Platform?

1. Goal of GMB Platform

1.1. To go beyond the limitations of existing blockchain and cryptocurrency, and implement blockchain and cryptocurrency that can be used in real life

1.2. Ensuring absolute transaction processing speed and scalability of services

1.3. Dual-Cryptocurrency system that enables everyone to store asset values and use in real life

1.4. A blockchain platform that links services such as travel, finance, medical, transportation, accommodation, and entertainment

[Fig 1] GMB Ecosystem

2. GMB Coin

Dual-Cryptocurrency System - Master Coin & Branch Coin

Master Coin

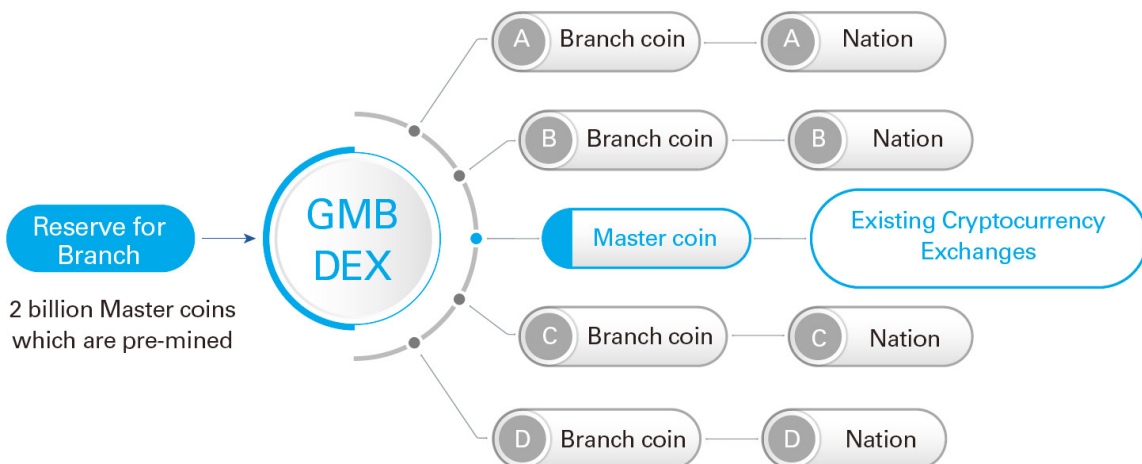

Acts as the key currency in GMB Platform, will be listed on the International Exchange and have volatility

Branch Coin

Will be issued for each country, and the values of each Branch Coin will be set according to the local fiat currency

GMB DEX (Decentralized Exchanges)

Exchange Master Coin and Branch Coin through GMB DEX, our own decentralized exchange. Rates will apply according to the market price and exchange price at the time of exchange. Branch Coins will be exchangeable with other Branch Coins of other countries.

[Fig 2] GMB Coin & GMB DEX

3. Features of GMB Platform

3.1. Ensures absolute transaction processing speed and scalability of services:

'Mikkschain', a high-speed blockchain solution that combines software and hardware, achieves block generation time of 5 seconds and transaction processing speed of 1 million TPS

3.2. Consensus

POPS (Proof of Power Specification & Stake)

Hardware-based proof of stake consensus algorithm
Block Generation Node & Stake Participating Node = Block Generation and Compensation

Block Generation Nodes

Nodes that demonstrates optimal hardware performance is given power to generate blocks

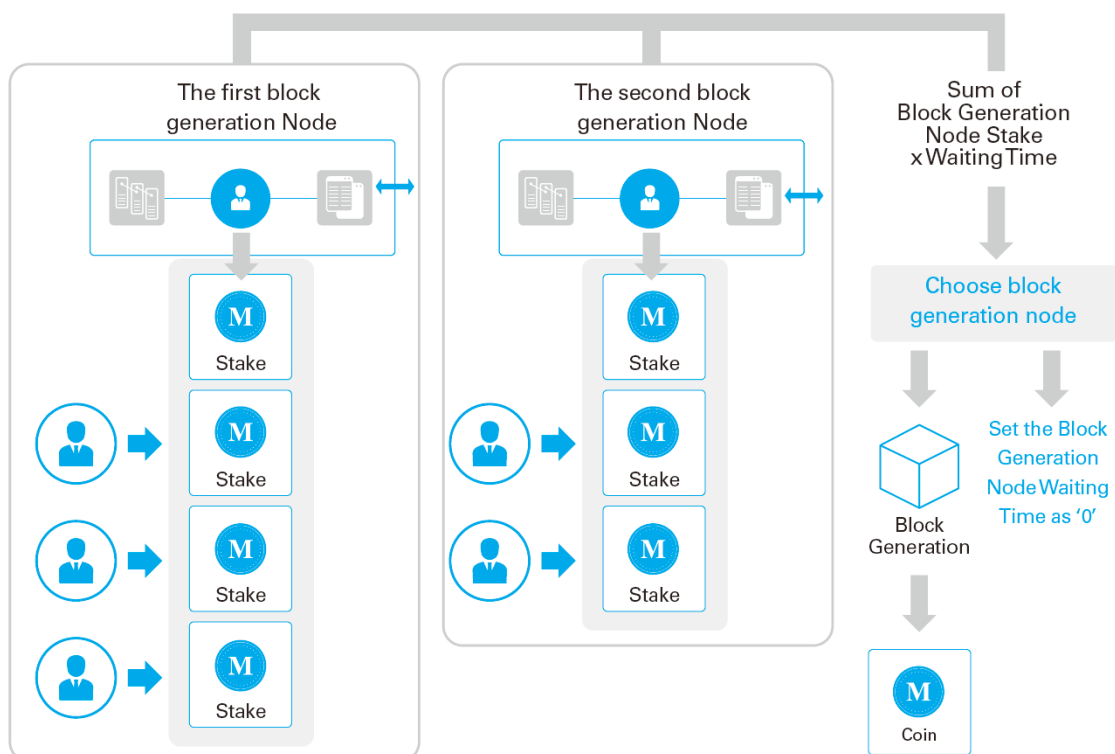

Stake Participating Nodes

After the Stake Participating Node selects one of the block generation nodes, participation of one's own stakes in block generation node is allowed; therefore, increasing block generation authority.

Block Generation Authority

Block generation is done by the node with the highest block generation authority amongst the block generation nodes.

Block Generation Authority = (Stakes of Block Generation Node + Stakes of Stake Participating Node) * Waiting Time

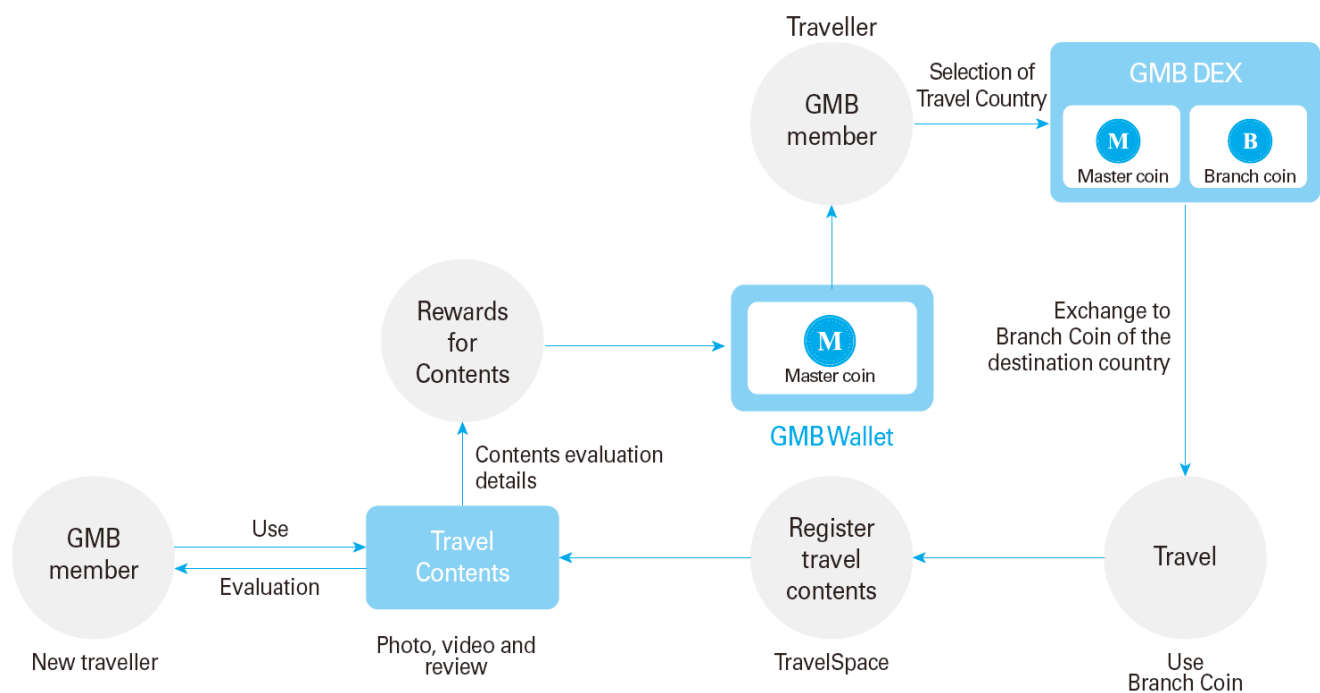

[Fig 3] POPS Proof of Stake and Block Generation

4. Service Platform

4.1. GMB Platform can be applied to service platforms in various business fields. The first step that we will implement is to the travel business field with the creation of TravelSpace, a travel specialized community service. Starting with travel, we will expand to transportation, airline, accommodation, entertainment and trade.

4.2. TravelSpace

We applied a change in the concept of travel from 'consumption' to 'profit'. Travelers can register various travel experiences, such as travelogues, photos, pictures, videos, and etc. as travel content, and receive rewards. Travelers will be able to use this to obtain more helpful information on their next trip.

[Fig 6] Share Your Travel Experience with TravelSpace

Simple and Fast Exchange System

Exchanges during traveling is a necessity for everyone. However, through the use of GMB DEX (our own exchange), users will be able to exchange from Master Coin to Branch Coin on the spot. Exchanges in the system are fast and simple just as the fiat currency of the travel destination.

Accommodation Sharing System

Apply the advantages or penalties to the actual user for accommodation through verified information and review.

Accommodation Sharing System with verified information allows direct access to the use of local accommodation or living space of local residents.

Location Based System Applied GMB Map

GMB MAP is established through the sharing of GMB users' travel schedules and discovery of hidden travel destinations. By providing rewards for such information, we share a new and richer travel experience for travelers.

Simple and Convenient

A payment system that can be used in real life designed to be simple and convenient with constant updated and live information and rewards.

A tour guide and companion.
